1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 - 33, drawn to at least nine inventions that are not linked by common features. At least nine devices are described in claim 1 that can measure porosity or hardness or light absorption ... or bacterial infection, that is, completely different tissue properties. These devices are therefore of completely different designs.

Group II, claim(s) 34 - 45 and 81 - 87, drawn to a device for supporting the remineralization of hard tissue.

Group III, claim(s) 46 - 58, drawn to a device for producing a working channel in hard tissue.

Group IV, claim(s) s 59 and 60, drawn to a diagnostic medium with marker substance.

Group V, claim(s) s 61 - 73, drawn to nine different treatment mediums.

Group VI, claim(s) 74 - 80, drawn to three differing treatment substances that do not share any common special technical features with the preceeding independent claims.

2. The inventions listed as Groups I - VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: there are 24 separate inventions that are not linked by common "special technical features".

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
